DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dalisa et al, patent 4218302 in view of Saxe et al, patent 5650872. Dalisa et al discloses an electrophoretic display device that changes appearance in response to an electric field (see the abstract), but does not necessarily have a protective layer for the electrode, however, Saxe et al in figs. 5 and 7 show the use of protective layers 29. It would have been obvious to one of ordinary skill in the art to use a protective layer in Dalisa et al because it would give chemical stability to the electrode (fig. 7, Saxe et al) or mechanical stability (fig. 5, Saxe et al).

3. Claims 2-10 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 21-24, 26-33, 37 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

For claims 2-10, the details of the structure of the system with the details of the protective layer are not shown or suggested by the prior art. For claims 21-24, 26-33, 37 see paper no. 6.

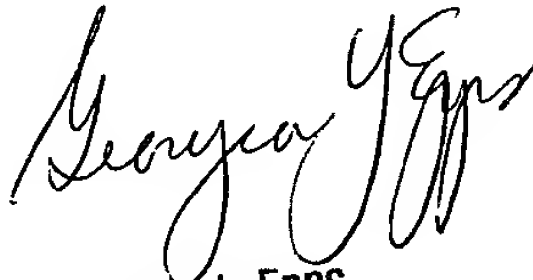

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chimenti discusses chemical deterioration of the electrode and the use of a protective layer (col. 28, lines 38-45).
